

## **Industry IT Environment Checklist**

**Is your technology where it needs to be? Take a moment to reflect on these 10 questions.**

- 1. Is your current technology setup keeping up with operations as the business grows?**  
☐ Yes    ☐ Somewhat    ☐ Not Sure
- 2. Do you rely on any single workstation, device, or person to run a critical system or piece of equipment?**  
☐ No    ☐ Somewhat    ☐ Absolutely
- 3. Does your Wi-Fi and network coverage work reliably across your entire facility—including shop floors and warehouses?**  
☐ Yes    ☐ Spotty in Places    ☐ Unreliable
- 4. Are your older machines and modern software working together smoothly?**  
☐ Yes    ☐ Occasionally Struggles    ☐ Not Integrated
- 5. Can your remote or field crews stay connected without relying on workarounds like phone hotspots?**  
☐ Yes    ☐ Sometimes    ☐ Not Really
- 6. Is your backup system tested, reliable, and capable of restoring your large design or project files?**  
☐ Yes    ☐ Not Sure    ☐ Not Confident
- 7. Do you find yourself stuck handling tech issues instead of leading operations?**  
☐ Rarely    ☐ Sometimes    ☐ All the Time
- 8. Do you have a clear, long-term IT plan that goes beyond patching short-term problems?**  
☐ Yes    ☐ Somewhat Planned    ☐ No Plan in Place
- 9. Is your network and system security strong enough for the work you're doing?**  
☐ Yes    ☐ Needs Review    ☐ Not Sure
- 10. Would you benefit from project-based help or a second opinion?**  
☐ Yes    ☐ Maybe    ☐ Not Sure

## **What's Next?**

This checklist is a great first step toward understanding how your tech is really holding up under pressure. But you don't have to figure it all out alone.

## **We can walk through it with you, point by point.**

Our team at Hart Technology Solutions helps industrial operations build systems that are steady, smart, and ready for the real world.

Contact us to schedule a review of your checklist, and together we'll chart a path that makes the work easier, not harder.
